

Genus, the all-in-one care system

Genus is the care system designed for professional care organisations. Genus monitors, reminds, alerts, and contacts caregivers or professionals when necessary.

At the heart of the system is the Genus device with seven built-in sensors to measure day rhythm and living environment, the camera, screen and large speaker are used for communication whilst the alarm button will alert the right people when needed.

Nurse Call System

Day Rhythm Support

Personal Alarm System

Lifestyle & Home Monitoring

Additional sensors and alarm buttons can be connected to expand the system to the whole home and beyond whilst the Genus Routines Engine will alert in case of unexpected behaviour.

Whilst friends and family are connected through the Genus App, the professional caregiver has the option of the Genus Portal or the dedicated Care App.

Telecare & video consultation

Medication Management

Social Care

Hospital @ Home

Integrated with many of the leading alarm centres and health platforms, Genus supports care organisations and telecare providers alike

Being ISO 27001 & NEN 7510 certified makes Genus Care a trusted partner for your next generation care solutions.
