

Lorenzo's House, is a global, virtual charity organisation empowering the sons, daughters, children and their families affected by younger-onset dementia (YOD) in over 23 countries through our free virtual support model: MATCH, CLUBS & SUMMIT. We are the global hub of connection, resources and light - *healing in community & advocating for dementia*.

We aim to shift the narrative for the over 16M *family members worldwide affected by younger-onset dementia – who are left unseen, misunderstood, misdiagnosed, undiagnosed and under-resourced*. No longer do we live in the shadows as our young people have launched **NEXTGEN: a global advocacy movement**.

Stand with our movement...Our NEXTGEN VISION is to be the first generation to meet dementia without silence, shame or invisibility. We unite as changemakers...a like-minded group of sons, daughters and children of younger-onset dementia, as well as, passionate allies - determined to raise awareness, end stigma, inform policy, normalise conversations around brain change, drive dementia justice and build a more empathic world.

Our Goals:

1. **Attract & Unite** committed people seeking dementia justice for families affected by younger-onset dementia.
2. **Identify & Develop** critical topics for change and develop courses and activities to prepare us for leadership roles at conferences, screenings, podcasts, our annual SUMMIT and more.
3. **Design & Implement** a strategic advocacy plan that gives agency to all members who individually and collectively work to build a YOD-informed society - leveraging our young people as our compass.

The Lorenzo's House inaugural in-person **NextGen Roundtable** will convene in collaboration with Alzheimer's Disease International (ADI) at the [ADI Conference](#) in Lyon, France spring of 2026. We aim to have over 50 sons, daughters and children of younger-onset dementia, joined by allies in the movement, engage in conference events and city immersion awareness experiences. This will be the inspiring beginning of a regular convening to amplify our global advocacy movement.
